SUMMARY

Software Engineer with professional expertise in building high-performance, concurrent backend services using **Go**. Proven track record in **Type-Safe Database Engineering** with PostgreSQL and sqlc, and architecting lean, server-driven frontends using **HTMX**. Experienced in managing the full development lifecycle—from schema design to production debugging—within **Linux** environments. Committed to SDE best practices and delivering modular, scalable code that solves complex business logic.

TECHNICAL SKILLS

Programming Languages:	Go (Golang), Python, C, JavaScript
Cloud & DevOps:	AWS EC2, Docker, Git, GNU/Linux
Web Development:	HTML5, CSS3, JavaScript, Django (basic experience)
Databases:	mySQL, PostgreSQL (with sqlc), SQLite
Operating Systems:	GNU/Linux, MS Windows, MAC OS
Software/Tools:	Zed, LibreOffice, MS Office
AI tools:	Gemini, ChatGPT, DeepSeek, etc

EXPERIENCE

Software Engineer | Our Thoughts - LSKJ, Bengaluru | July 2025 – November 2025

- **Core Backend Development:** Architected and implemented scalable backend services using **Go**, translating complex business requirements into high-performance, concurrent system flows.
- **Type-Safe Database Engineering:** Managed **PostgreSQL** schemas and utilized **sqlc** to generate type-safe Go code, significantly reducing runtime errors and ensuring data integrity.
- **Full-Stack Integration:** Developed dynamic, server-driven user interfaces using **HTMX** and **Vanilla JavaScript**, simplifying frontend architecture while maintaining responsive **HTML/CSS** layouts.
- **Problem Solving & Best Practices:** Diagnosed and resolved real-world production issues through rigorous debugging, while maintaining **SDE best practices** (code reviews, modular design, and documentation).

INTERNSHIP

Cloud Practitioner Intern | TechFortune Technologies, Bengaluru August 2022 – September 2022

- Gained foundational knowledge of cloud concepts, including **AWS architecture** and core services.
- Assisted with basic deployment tasks, focusing on understanding virtual machine provisioning (**AWS EC2**) and basic containerization concepts (**Docker**).

Web Developer Intern | Softmusk Technologies, Belagavi *August 2019 – September 2019*

- Contributed to front-end development tasks, applying skills in **HTML, CSS, and JavaScript**.
 - Worked within a team structure, gaining initial exposure to professional software development workflows.
-

PROJECTS

- **Facial Emotion Recognition (FER)**
 - Developed a **Machine Learning model** capable of identifying human emotions (e.g., happiness, sadness, anger) based on real-time facial expressions.
 - Utilized **Python** and key ML libraries: **TensorFlow, Keras, and OpenCV** for image processing and model training.
 - *Result:* Successfully implemented a functional prototype demonstrating core computer vision and deep learning skills.
 - **Student Management System**
 - Designed and built a full-stack mini-project to efficiently manage and maintain a students' database.
 - Employed a web development stack including **Django** (Python framework) for the backend and **MySQL** for data persistence and implemented the user interface using **HTML, CSS, and JavaScript**.
-

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science: KLE College of Engineering and Technology, Chikodi *October 2020 – September 2023* | CGPA: 6.73

Diploma in Computer Science : *KLE's C.B. Kore Polytechnic, Chikodi June 2017 – July 2020* | **CGPA: 7.1**

LANGUAGES

- **Kannada** (Intermediate)
 - **Hindi** (Fluent)
 - **English** (Proficient)
 - **Urdu** (Native/Fluent)
-
